## FOR THE 1946 SEASON

we are offering rooted and unrooted cuttings of 300 chrysanthemum varieties which will be available beginning January 1. We suggest that orders be placed early, as usual consideration for shipment shall be determined by the date order is received. When ordering please indicate earliest date you wish to receive shipment.

## CATALOGUE CONTENTS

- Pages 3-13. Novelties with descriptions.
- Pages 14-25. Cut flower schedule made up of the more widely grown and newer varieties.
- Pages 25-28. Pot plant schedule made up of the more widely grown and newer varieties.
- Pages 29-35. Price list.

## TERMS OF SALE

1. The **minimum** total order that can be accepted is **250 cuttings**.
2. **Fifty of each variety** is the **minimum** that can be supplied.
3. More than **50** of a variety must be in **multiples of 50**.

## **MARGARET MOELLER** (Yoder Bros.)

A clear white standard that matures December 10, following December Glory and just preceding Smith's Late White. It is a very formal, tightly incurved flower and possesses excellent substance. The growth habit is clean and vigorous with beautiful foliage carried well up to the flower. The medium-sized stems are extremely rigid. Its shipping and keeping qualities are unequalled by any standard in its season. This variety responds well in either raised or ground beds. However, it is especially suited to ground bed culture, and attains its largest size and greatest commercial value when handled in this manner. By the application of electric lights, this variety can easily be delayed for Christmas and later flowering. Price \$100.00.

## PINOCCHIO (Yoder Bros.)

A glistening white button for early cloth house shading. It responds beautifully to black cloth treatment and for this reason we believe it will fill the insistent demand for a small white pompon that can be easily shaded into late August and early September maturity. The flower is a beautifully formed tightly quilled button of lively and dainty appearance. It is of hard substance and has good keeping and shipping qualities. The color is a clear sparkling white. The growth is vigorous, taller than Irene and requires less time between pinching and shading to form a fuller spray of flowers. Bunches of Pinocchio appear smarter than Irene because the spray formation is more nearly single planed; and fresher because of the more uniform opening of its flowers. Price \$100.00.

## RUSTICON (Yoder Bros.)

An intense rust red pompon for Thanksgiving. The flower is of a very attractive, decorative form having excellent substance and a very full petallage. The growth is vigorous and persistent. It is of extremely easy culture, its dark rigid sprays and high production combine to give it a definite place in the highly competitive Thanksgiving season. It possesses more vigor than Red Rolinda, a quality of flower far superior to Legal Tender and just precedes Bronze Goldsmith in flowering. The very appealing color of Rusticon is a rich blend of crimson and rust bronze which commands immediate attention at Thanksgiving. Price \$100.00.

## **IVANHOE** (Yoder Bros.)

A small reddish bronze mum, especially suited for early cloth house culture. The flower is decorative in form, similar but more formal than Glitters. Its hard substance gives it unusual shipping quality. Foliage is small and is carried right up to the bloom. Stems are rigid and must be disbudded to a single flower. Like the Mandel varieties, it is vigorous and consistently produces a uniform crop. Because of its free breaking habit, it will stand fairly close cropping and still produce uniform stems. This same quality results in well shaped plants when grown in pots. Ivanhoe holds its color well under early shade when good bronze disbuds command a premium market. Its natural season is November 1st. Price \$100.00.

## **GRANITE STATE** (G. J. Ball, Inc.)

A small, clear white mum ideally suited for pot plant culture. The flower is of good substance, semi-incurved form and matures normally October 25. The growth habit is similar to Richard Mandel, being dwarf and compact. Granite State responds well to early shade, producing a quality flower much superior to Christina. A fine contribution to pot plant culture from the University of New Hampshire. Price \$100.00.

## **MATCHLESS** (De Petris)

Judged by present day standards this variety by all odds seems to be the best white pompon introduced to date. Matchless possesses large solid blooms of great substance. These are well placed on strong sprays. Stems are of ample length and are clean, straight and rigid. Its growth is very free and robust with beautiful light green luxuriant foliage. The variety breaks freely from pinches and produces well under nearly all conditions, the production being very good either in ground or raised benches. Normal blooming date November 20th to 22nd, making it ideal for Thanksgiving. Matchless shades well and for this purpose should be an excellent variety to follow Bushnell and similar varieties. We can recommend Matchless as a productive and an easily grown variety that responds well to nearly all types of cultural conditions. Awarded gold medal 1943. Price \$100.00.

## **GOLDEN EMBLEM** (De Petris)

Medium sized clear yellow pompon that blooms normally the end of November. The flowers are produced on well spaced sprays and are of close compact form with very good substance. It combines good quality with good production and disease resistance. Good results are obtained either in ground or raised benches. It will not produce blind growth so common in late varieties. Maturing the latter part of November, Golden Emblem will be found to be a welcome addition to yellow pompons in that season where quality and easy growth is combined with good production. Price \$100.00.

## **HARVESTER (Yoder Bros.)**

An intense canary yellow standard that blooms for Thanksgiving. The flower is of medium size, hard and durable. its bright, lustrous color; its wax-like petals and its very attractive semi-incurved form give this variety an appearance of substance and freshness that commands immediate attention. The foliage is attractive and healthy and is carried right up to the base of the flower. The stems are medium in size, strong and rigid. Harvester is a good shipper and is well liked by the retail trade. We recommend this variety to all growers as an easily grown bright yellow standard for the Thanksgiving season. Price \$100.00.

## **YELLOW CAMEO (Yoder Bros.)**

A deep lemon yellow sport from Cameo. The form and growth habit are identical with the parent variety. Because of the increasing popularity of Cameo, this attractive yellow counterpart should be a very valuable variety for early December flowering, when Yellow Cordova is cut out and December Gold and Vibrant not yet ready to cut. The flower opens slowly, increasing in size, attractiveness and substance until at full maturity it is at its best. Even after full development the crop may be held for a considerable time. Because of its strong well branched spray and large sized flowers, it bunches to good advantage. Very acceptable in any market. A good producer that is easy to grow. Price \$100.00.

## REVELATION (Yoder Bros.)

Revelation fills the need for quality white pompons for the January market. It will thrive and produce abundantly under any condition or method of growing that will produce a satisfactory crop of Garza. It has never been known to go blind. Revelation makes possible the easy production of high quality white pompons for Christmas and early January, without loss of production or risk to the grower. With the careful application of a small amount of electric light, its flowering can be extended into early February. Price \$50.00.

## SUNNYSIDE (Yoder Bros.)

This variety fills the persistent demand from all wholesale growers for a round, hard flower which will ship and handle without bruising or other damages. It is a strong grower and will consistently produce a heavy crop of well-branched sprays that are easy to bunch. The quality of flower is equal to or better than any existing yellow pompon regardless of season. The color is a clear, brilliant yellow. Its season is Thanksgiving and later. It will hold well on the bench. Price \$50.00.

## **RIVIERA** (Yoder Bros.)

A luminous pink decorative pompon blooming normally about December 10, just nicely following Minuet. This variety finishes beautifully, maintaining its color and form much better than existing varieties that bloom at the same season. The flower is showy and of good substance. Its heavy petallage permits an extended season of cutting. The growth is vigorous, of medium height and high production. The spray resembles that of Snow, being extremely rigid and well branched. With the application of electric lights Riviera is easily delayed to the important Christmas season. Price \$50.00.

## **VESPER** (Yoder Bros.)

This variety combines the flower quality of Rev. Bushnell with the free growth and high production of Sea Gull. It is a pure white pompon of unusually good substance, blooming normally November 10. Its heavy petallage permits a long period of cutting. Under black cloth shade, it just follows Sea Gull. Of free growth and easy culture, Vesper raises the existing standard of dependable and profitable early white pompons. Price \$50.00.

## **BARCAROLE** (Yoder Bros.)

An intense golden yellow pompon that blooms normally November 5. The habit of growth is outstandingly vigorous. It is of extremely easy culture and its smart, dark, glossy foliage, its rigid sprays and high production mark it as a real bread and butter variety. It responds rapidly to shade, flowering with Nuggets when shaded with that variety. We suggest that those who now grow Mary Lennon Hall under black cloth will find Barcarole a more satisfactory variety. Price \$100.00.

## **BITTERSWEET** (Yoder Bros.)

A beautiful medium-sized bittersweet red daisy that blooms normally November 8. The flower possesses good substance and keeping qualities. It retains its brilliance with full maturity. The flower has from 3 to 4 rows of stiff, broad petals that lay perfectly flat, giving a fresh, lively and attractive appearance. Bittersweet has a stiff wiry stem and produces well-branched sprays. The foliage is small, dark-green and glossy. It bunches well and because of its striking color and attractive foliage, it commands attention when displayed with other varieties. Bittersweet creates its own market demand. Price \$100.00.

**BRONZE GOLDSMITH (Yoder Bros.).** A sport from the original variety Goldsmith, similar to and richer in color than well-grown Natoma or Red Princeton. Its color is always in keen demand. In growth and season, it is identical to the parent variety. Carefully grown, Bronze Goldsmith on disbudded sprays is, for bronze pompons, unsurpassed in quality and value for late September and October flowering in the cloth house. Price \$80.00.

**MINUET (Yoder Bros.).** A soft pink pompon similar in color to Mrs. Morgan Bulkeley and equal or better than that variety in flower quality and growth habit. Minuet provides a pink pompon for Thanksgiving that is so superior to existing late November pink pompons that it should become the leading variety for that season. Price \$80.00.

**SYLVANNA (Yoder Bros.).** One of the few cloth house daisies that combine a high quality flower and a growth habit that can be depended upon to produce a heavy crop under a wide diversity of soils and cultural conditions. The color, a brilliant orange bronze, holds well with full maturity, allowing an extended period for marketing. When successively shaded, Sylvanna makes a fine cut flower from the middle of September until November 10, its natural maturing date. Price \$80.00.

**ARGO (De Petris).** A medium-sized pompon with good decorative form and excellent substance for Thanksgiving and early December. The color is a beautiful bronzy orange, shading to a rust. In color and in growth habit, which is somewhat dwarf and rigid, it resembles the later variety Cavalcade. It makes its growth late in the season and therefore should not be planted late. Argo is a quality pompon with a very appealing color which sells on sight. Price \$80.00.

**NEVADA (De Petris).** A desirable and useful anemone producing flowers of high quality for Thanksgiving. The color is pure white with a chartreuse green center. This variety responds well to generous spacing and disbudded spray technique. For the grower who appreciates Europa, Valencia and its sports, Nevada provides a white of equal quality. Price \$80.00.

**TRIANON (De Petris).** The outstanding merits of Trianon are its appealing crimson bronze color, the perfect form of its small round flowers, its hard substance and its attractive bunches and fine shipping qualities. Its season is that of the well-known variety New York. It is better than that variety in flower color and form. It is in a class with the variety Fez in respect to the quality of flower and superior to that variety in type of growth and the resistance of its foliage to the ravages of insects and disease. It responds normally to shade and holds its color well. Price \$80.00.

**MAHOGANY VIKING (Delworth & Son).** This novel and beautifully colored sport from Viking has a more vigorous growth habit than its parent. The color is intensified to a rich mahogany bronze. The flower is larger and bunches to greater advantage than the parent variety. Growers should find this variety more profitable than the original Viking. Price \$80.00.

**CRIMSON CARNELIA (Delworth & Son).** A distinct color variation from the original variety, Carnelia. The color of this sport is an intense crimson which holds well. It possesses all the good qualities and characteristics of the parent variety. Price \$80.00.

**APRICOT VALENCIA (Yoder Bros.).** A beautiful apricot or rose-wood buff sport from Dark Pink Valencia. In growth and form it is identical with this variety, being less vegetative than the original Valencia. The color is distinctly new in this group. It is a favorite with retailers. To the grower of Valencia, we say without hesitation that Apricot Valencia is a valuable addition to this group. Price \$50.00.

**GOLDEN JANE (Yoder Bros.).** A beautiful golden intensification of the original buff-bronze Jane. Much brighter and more vivid in color and for this reason a more desirable variety. We predict this variety will replace Jane. Price \$50.00.

**IVORY SNOW (Delworth & Son).** A very soft ivory yellow sport of Snow that provides a color that is extremely useful to the floral designer. The very favorable market response to Ivory Snow, together with the increasing popularity of the pale pastel shades of color, indicate clearly that growers of the variety Snow will find this new sport a valuable and profitable supplement. Price \$80.00.

**NAVAHO (Yoder Bros.).** A medium-sized deep crimson, decorative pompon which changes to a reddish bronze under early shading. It responds well to black cloth and fills a great need for a cloth house variety in its color range. It is at its best when growth is kept soft, plants are generously spaced, and its crop limited to 3 or 4 stems per plant. When so grown, it is undoubtedly the best red pompon for cloth house culture. Price \$50.00.

**PIXIE (Yoder Bros.).** A small, well-rounded pompon somewhat larger than Nuggets, with a color that is much brighter and more attractive. It is a remarkably good shipper. It responds beautifully to shading and is therefore an important yellow pompon for the cloth house during September and October. It blooms normally November 10. For the grower who wants small hard pompons of simple, easy culture, we recommend Pixie. Price \$50.00.

**ANACONDA (De Petris).** A large-flowered incurved commercial possessing excellent substance. It matures November 10, just following Detroit News and preceding Mrs. D. F. Roy. The color is a deep coppery red with golden bronze reverse. A combination very similar to the variety Mrs. D. F. Roy. When shaded for early October, the color is a rich golden copper. Price \$50.00.

**SEAFOAM (De Petris).** A pure white, medium size pompon that blooms November 20-25. The flower resembles that of Rev. Bushnell. It has proven to be an important variety for late September and early October flowering in the cloth house. For later flowering it produces a quality product when carefully grown on raised benches. Price \$50.00.

**CASSANDRA (De Petris).** A bright orange bronze pompon that is a distinct advance in color for its season of November 10. It has fully rounded form and good substance. Cassandra has proven an excellent variety for cloth house shade, producing an early crop with little fading. Its cultural requirements are identical with Mrs. Bulkeley and Rev. Bushnell. Price \$50.00.

**GOLDEN SURPRISE (De Petris).** A medium sized yellow pompon of value because of its season just prior to and including Thanksgiving. The growth habit is free and productive. A valuable color in a season when yellow pompons are in great demand. Its increasing popularity is due in part to its rapid response to black cloth shade. Price \$50.00.

## New Garden Varieties

**AVIATOR (De Petris).** We predict that this new rich coppery red will be the most popular garden Chrysanthemum of its color. The quality of the blooms compares favorably with the finest greenhouse pompons. A vigorous and easy grower, coming into full bloom October 10. Price \$100.00.

**MORNING STAR (De Petris).** A large fully double soft primrose-yellow shading to cream-yellow. Extremely early flowering, blooming from late August until killing frost. The dwarf, vigorous and spreading plants are literally covered with myriads of bloom. It is extremely hardy and the foliage is disease resistant. Price \$100.00.

**ALLEGRO (De Petris).** A charming and beautiful variety that will be welcomed by all connoisseurs. It is difficult to describe the unusual blend of glowing shrimp-pink suffused with coppery salmon. One of the finest varieties for cutting, coming into full bloom October 15th. This variety may be disbudded to produce single blossoms. Price \$100.00.

**MORNING GLOW (De Petris).** A lovely early flowering lavender to mauve-pink without a trace of magenta. A most desirable color. Price \$100.00.

For  
Garden

# TO=NA=CIDE

For  
Greenhouse

**For Mums, Roses, Carnations, Snaps, Callas, Gladioli, Dahlias,  
Asters, Delphiniums, Vegetables, etc.**

Use To-Na-Cide as a control for Thrips, Sow Bugs, Slugs, Centipedes, Millipedes, Manure Grubs and Manure or Earth Worms. To-Na-Cide will destroy cut worms in your lawn. For Japanese Beetle Grubs, To-Na-Cide will kill them. Use To-Na-Cide for keeping certain insects, Rabbits and Moles from eating your vegetables and flowers in your garden.

**25 pounds will cover 1500 square feet — 100 pounds 6000 square feet**  
**Send for Special Circular with directions**

5 pounds, \$1.25; 10 pounds, \$2.00; 25 pounds, \$4.00; 50 pounds, \$7.00; 100 pounds, \$13.00. Less 2% for Cash with Order. F. O. B. New York.

August 17, 1944.

Dear Mr. Irwin:

Perhaps you recall last Fall when I visited your place that you recommended To-Na-Cide to act as a repellent for mice to keep them from chewing bulbs out in the open.

There apparently seemed to be plenty of mice runs through the sawdust and in some cases in under the flats, but they did not chew the bulbs as they had been in the habit of doing. Test spots where we did not use it were quite badly chewed.

We would like to have you ship 200 lbs. to Ithaca and 200 lbs. to Newark Valley.

Sincerely, W. H. STIMMING.

Indianapolis, Indiana, July 21, 1942.

Dear Sir:

Thanks for your prompt shipment of To-Na-Cide. We are ready to plant carnations and we like to give our beds a sprinkling of To-Na-Cide. We find it eliminates that pest Sow Bugs and also helps to clean up Thrip. We also sprinkle a light dose on empty benches before we set our plants as we find that insects just do not like To-Na-Cide.

Thanks again for your promptness in taking care of our orders, we are,

Very truly yours,

PAHUD FLORAL CO., INC.
